

Dear retail professional,

Lite Lion (HK) and Lite Lion Europe have developed a novel service concept for retail chains: Face Mask Vending Machines placed in the sales spaces and lobbies.

The device is a detached, free-standing unit. As the unit does not demand mounting, it suits perfectly also for modern glass and other design material building. The SlimLine model saves space and floor area.

The Machine is equipped with a versatile payment terminal. The terminal is designed for the contactless cards to be primary payment method as it is the most hygienic one. This Machine is equipped with few other innovational hygiene aids to meet the newest antibacterial/antimicrobial standards. We are looking forward on telling you more about the unique features of this Face Mask Vending Machine.

The Machine's main mission is to offer customers an easy way of buying face masks, thus making their visit to your premises more comfortable and durable, it is also a step forward new cleaner surroundings. The expense caused by an automatic disinfection aid dispenser are also supposed to be covered with revenue from masks' sales.

The masks sold from the Machine are individually packed. The range can include two different kinds of masks and gloves. The product prices in vending machine are for consumer approximately (per piece): civilian mask 0.80€, KN95 respirator 2.00€, gloves 0.50€/pair.

The Face Mask Vending Machine's complectation is variable. The cover colours, payment methods and other details are negotiable and can be specified in according to the client's needs.

We will be glad to share with you more details about the concept.

Let's make the planet a safer place to live!

Looking forward on hearing from you soon.

Sincerely,

Esa Honkaneva
